DETAILED ACTION

Specification

1. The abstract of the disclosure is objected to because on line 7 of the amended abstract, "assembly" should be replaced by --assembling--. Correction is required. See MPEP § 608.01(b).

Claim Objections

2. Claim 10 is objected to because of the following informalities: On line 5 of claim 10, "with" should be replaced by --within--. Appropriate correction is required.

Claim Rejections - 35 USC § 112

3. Claim 13 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 13, applicant has apparently left out some intended language from line 2 of the claim ~~2~~ since as currently recited the claim does not make sense.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1, 3-5, 7-9, 11, and 13-15 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by USSR 685301 (Fig. 3).

Art Unit: 1724

Applicant should note that the valve member of the reference clearly includes a perforated top wall (6), a perforated front side wall (9), and two unperforated side walls (8).

6. Claims 1, 3-5, 7, 11, and 14-16 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by USSR 766609 (Fig. 1).

Applicant should note that the valve member of the reference clearly includes a perforated top wall, a perforated front side wall, and two unperforated side walls. Applicant should also note that the front side wall provides three distinct perforations when the gas pressure used within the column is insufficient to lift the valve above the point where the triangular dents in the top wall at the front side wall edge touch the tray deck surface.

Allowable Subject Matter

7. Claims 2, 6, 10, and 12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

8. Applicant's arguments with respect to claims 1-16 have been considered but are moot in view of the new grounds of rejection.

It is noted that applicant has only presented substantive arguments with respect to independent claim 1.

If applicant elects to amend the independent claim to include one or more of the allowable dependent claims as noted in paragraph 7 above, applicant should also cancel the non-elected claims 17-38 to facilitate a speedy allowance of the application.

Conclusion

9. Applicant's amendment necessitated the new grounds of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
